DC Build Solutions

According to HPE, "Transforming to modular-based data center facilities will help your service delivery, not only from your core data centers but also at the edge and for your distributed IT."

The edge comes to the center in digital transformation, especially when it comes to the datacenter design. This means traditional data centers don't cut it in today's digital world.

Techspire Services provides a wide range of Cabling, DC Designing, Building, Smart DC Management Solutions, **Smart Row** and **Smart Cabinet,** smart racks as the basic building block of a modular datacenter. Each datacenter will include smart racks for server, storage, networking, power, UPS, cooling, access control and fire fighting elements.

Techspire Services will ensure the optimized cost built solution crossing the industry benchmarks and with all the advisory and customizations required.
